Art Unit: 1765

DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1 to 32, 38, 52 to 55 are drawn to a crystal growth apparatus, classified in class 117, subclass 200.
- II. Claims 33 to 36, and 39 are drawn to a process, classified in class 117, subclass 68.
- III. Claims 37 and 40 to 48 are, drawn to thermocouple, classified in class 439, subclass 1.
- IV. Claims 49 to 51 are drawn to an holder, classified in class 117, subclass 221.
- 1. The inventions are distinct, each from the other because of the following reasons:

 Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to preform another process such as the purification of metals.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different

Art Unit: 1765

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct as one is a crystal growth apparatus and the other is a means to monitor temperature of materials which are two separate apparatus.

Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct as one is a crystal growth apparatus and the other is a means to hold thermocouple, which can be used in other apparatus, thus the invention are distinct

Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to preform another process such as the monitoring temperature of rolled steel.

Inventions IV and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

Art Unit: 1765

another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to preform another process such as the purification of metals.

Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions one invention monitors temperature while the other merely hold in place a probe so that readings are consistent. Thus, the inventions are different and distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37) CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1765

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Kunemund whose telephone number is (703) 308-1091.
